GENERAL INFORMATION

1. Whenever the terms left and right are used, it should be understood to mean from a position facing in direction of travel.
2. Throughout this manual you find common hardware not illustrated, but listed in the description column. The service part immediately preceding a hardware listing is the part using these particular items for mounting purposes. This hardware is not included with the service part or assembly when ordered as a replacement.
3. The illustrations show typical assemblies plus individual parts but in all cases may not show the exact shape or detail of parts required. However, the purpose for the illustrations is to identify parts performing like functions. Whenever possible, illustrations are located at the beginning of each section or immediately adjacent to the applicable text.
4. CNH America LLC is continually striving to improve its products. We must, therefore, reserve the right to make improvements or changes when it becomes practical and possible to do so, without incurring any obligation to make changes or additions to the equipment sold previously.

METRIC AND INCH HARDWARE

Allowances have been made in punched and drilled holes to allow interchangeability of metric and inch dimension hardware in fastening and mounting applications. However, this interchangeability does not apply to tapped holes or using metric dimension nuts on inch cap screws, studs and bolts. Likewise, inch dimension nuts cannot be used on metric cap screws, studs or bolts.

Following is a listing of Common sizes for substitution.

Inches	Millimeters
Screw Diameter	
3/16"	5 mm
1/4"	6 mm
5/16 "	8 mm
*3/8"	*10 mm
1/2"	12 mm
9/16"	14 mm
5/8"	16 mm
Screw Length	
5/8"	15 mm
3/4"	20 mm
*1"	25 mm
1-1/4"	30 mm
1-3/8"	35 mm
1-1/2"	40 mm
1-3/4"	45 mm
2"	50 mm
2-1/4"	60 mm
2-3/4"	70 mm
3"	80 mm
3-1/2"	90 mm
4"	100 mm

*EXAMPLE: For most applications a 3/8" x 1" cap screw and nut can be replaced by a 10 mm x 25 mm cap screw and nut.

For additional size information and possible substitutions, either inch to metric or metric to inch, please refer to the conversion table in this catalog.

This exploded view diagram illustrates the components of a boat's transom assembly. The main transom panel (10) is shown at the top, featuring a central rectangular cutout and side-mounted lights (7). Below it, the internal structural components are detailed: a transom plate (1) with a central hole, a transom support plate (11), and a transom support bar (9). The assembly is secured with various fasteners, including screws (4, 12, 13, 14, 15), bolts (3, 16), and a large transom pin (2). A transom pin (8) is also shown separately. A transom support bar (17) is shown at the bottom, secured with a transom pin (18) and a transom nut (19). A box labeled 'KIT KIT' (20) contains the necessary hardware for the assembly.

AXIAL-FLOW 8010

This technical drawing is an exploded view of a vehicle chassis assembly, likely for a motorhome or caravan. It shows the following components and their assembly relationships:

- Chassis Frame (1)**: The main structural component at the bottom.
- Valve Assembly (28)**: A complex assembly including a valve body (26), handle (27), and mounting bracket (29).
- Pipes and Hoses**: Various lengths of pipe and hose are shown, such as the long horizontal pipe (9) and the vertical pipe (7). They are connected via fittings like elbows (10, 15), tees (11), and unions (13, 14).
- Electrical System**: Includes a battery box (18) labeled "KIT KIT" and a control unit (K.62.B.05(1)). Wires connect these units to various terminals and switches (e.g., 12, 17, 24, 25).
- Accessories**: Other parts include a rectangular panel (19), a small box (20), and various fasteners like screws (21, 22) and nuts/bushings (30, 31, 32, 33).
- Labels**: Numerous numerical labels (1-33) identify individual parts. Two specific part kits are highlighted in boxes: "K.62.B.05(1)" and "G.10.A(2) G.10.A(1)".

This technical drawing is an exploded perspective view of a mechanical assembly, likely a vehicle's rear suspension or steering component. The assembly consists of numerous parts, each identified by a numerical callout. The parts are arranged in a disassembled state to show their relative positions and how they fit together. A central label 'K.60.B.75 (02)' is enclosed in a rectangular box. The drawing uses solid lines for the parts and dashed lines to indicate the assembly path and alignment. The parts are numbered as follows: 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, 17, 18, 20, 21, 22, 23, 24, 25, 26, 27, 28, 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 39, 40, 41, 42, 43, 44, 45. The assembly includes a main frame (1), a central pivot point (2), a steering knuckle (3), a suspension arm (4), a shock absorber (5), a coil spring (6), a control arm (7), a steering rack (8), a tie rod (9), a ball joint (10), a steering knuckle (11), a suspension arm (12), a control arm (13), a tie rod (14), a ball joint (15), a steering knuckle (16), a suspension arm (17), a control arm (18), a tie rod (19), a ball joint (20), a steering knuckle (21), a suspension arm (22), a control arm (23), a tie rod (24), a ball joint (25), a steering knuckle (26), a suspension arm (27), a control arm (28), a tie rod (29), a ball joint (30), a steering knuckle (31), a suspension arm (32), a control arm (33), a tie rod (34), a ball joint (35), a steering knuckle (36), a suspension arm (37), a control arm (38), a tie rod (39), a ball joint (40), a steering knuckle (41), a suspension arm (42), a control arm (43), a tie rod (44), a ball joint (45).
