## INTRODUCTION

Following is a brief summary of the system used in compiling this Catalogue. It is to your advantage to carefully study this summary.

- 1 **General:** This catalogue is divided into individual groups as indicated on the key page. The thumb tabs on this page direct the user of the Catalogue to the index page for each particular group. This Catalogue is also divided into four separate sections. Introductory pages, Indexes to Units, Illustrations and Parts Lists and Numerical Index.
  
- 2 **Indexes:** There are three types of Indexes in the Catalogue:
  - (A) Group Index in the front of the Catalogue.
  - (B) Separate Group Indexes to Units.
  - (C) Numerical Index at the back of the Catalogue contain a listing of part numbers.

NOTE: It is important that you refer frequently to the Index to Units. Failure to do so will result in not being able to locate the proper unit.

- 3 **Illustrations:** The "exploded views" of each unit show individual parts clearly and in their proper relationship to each other. This method of illustrating makes it easy to locate parts, whether they are ordered by description or by part number. Reference numbers only are shown in each illustration. These numbers correspond to those in the reference column in the list which follows each "exploded view".

**CAUTION:** Reference numbers should not be used when ordering parts. ALWAYS use Case IH part numbers or description when ordering.

- 4 **Method of Listing:** The Parts Catalogue is divided into groups or units. Parts are listed in order by reference number of illustration, followed by a description based upon "noun first" method in three languages. In the next column further information e.g. dimensions is given. The extreme right columns give the quantity required per tractor model.

"x" In quantity column - order as required.

Throughout this Catalogue the terms "Right", "Left", "Front" and "Rear" are to be interpreted as seen from the operators seat when facing forward.

- 5 **Part numbers:** In cases where the part number suffix letters have been advanced the new part will replace the old unless otherwise indicated. When 'R' suffix is used, R2 will work for R1, R12 will work for R11, R21 will work for R11 and R92 will work for R91 .

**Serial Numbers:** Serial number breaks are shown as - Ser. no. up to (-001309), from Ser. no. up (001 310-).

- 6 **Assemblies and Attachments:** Wherever possible the component parts of assemblies or attachments are shown in the "exploded views" by use of brackets or arrows. Component parts of assemblies or attachments are listed by one of the following methods:

- (A) For simple assemblies or attachments the listing is fully covered by description.
- (B) When four or more parts are contained in the assemblies or attachments the listing of components follow the description with the wording: - Consists of:
- (C) Assemblies or attachments consisting of many parts show the assembly or attachment number at the beginning of the unit list, followed by the listing of the components.

In cases where individual parts of an assembly are not available for service, those parts are indicated.

- 7 **Common Hardware Items:** (Attaching parts). Appear under the major items with which they are used. They should be ordered as listed, since they are not component parts of the pieces they attach. Hardware parts identified with part numbers have been designed for a specific usage. Standard hardware parts should not be substituted for them.

**WARNING:** Attaching parts especially made for their location should never be substituted with regular standard parts.

## INTRODUCTION

Vous trouverez ci - dessous un bref résumé du système utilisé pour rédiger ce catalogue. Nous vous recommandons de l'étudier attentivement.

- 1 **Generalites:** Ce catalogue est divisé en groupes individuels, comme indiqué au sommaire. Les onglets de cette page renvoient l'utilisateur à la page d'index de chaque groupe. Ce catalogue est également divisé en quatre sections séparées, c'est à dire les pages d'introduction, la table des matières, les illustrations avec listes de pièces détachées et l'index numérique.
  
- 2 **Index:** Ce catalogue comprend trois types d'index:
  - (A) Index des groupes au début du catalogue.
  - (B) Index séparés des unités de chaque groupe.
  - (C) Index numérique comprenant la liste des numéros de pièces, à la fin du catalogue.

NOTE: est important de consulter souvent l'index des unités. En ne le faisant pas, vous risquez de ne pouvoir localiser la bonne unité.

- 3 **Illustrations:** Les éclatés de chaque ensemble illustrent clairement les différentes pièces ainsi que la position exacte de chacune par rapport aux autres. Cette méthode d'illustration simplifie la localisation des pièces, qu'elles soient commandées par description ou par numéro de pièce. Seuls les numéros de repère figurent dans les illustrations. Ces numéros correspondent à ceux utilisés dans la colonne de référence de la liste de pièces qui suit chaque éclaté.

**MISE EN GARDE:** On ne doit pas utiliser les numéros de repère lors de la commande de pièces détachées. TOUJOURS utiliser le numéro de pièce. Case IH ou la description de la pièce à la commande.

- 4 **Listes de pièces:** Le catalogue - pièces est divisé en groupes ou en unités. Les pièces sont énumérées dans l'ordre des numéros de repère de l'illustration. Ces numéros sont suivis d'une description complète, commençant par le nom de la pièce et de la quantité requise par ensemble. Les pièces qui ne sont pas illustrées sont énumérées à la fin dans l'ordre alphabétique, par nom de pièce.

X" Dans la colonne quantité - A commander suivant besoins.

Dans ce catalogue les termes "Droite", "Gauchen", "Avant" et "UArrière" indiquent les emplacements sur machine vus de siège de l'utilisateur qui regarde vers l'avant.

- 5 **Numéros de pièces:** Lorsque les lettres - suffixes d'un numéro de pièce sont avancées, la nouvelle pièce remplacera l'ancienne sauf indication contraire. Lorsque le suffixe 'R' est utilisé, R2 remplacera R1, R12 remplacera R11, R21 remplacera R11 et R92 remplacera R91.

**Numéros de Serie:** Les discontinuités dans les numéros de série sont figurées comme suit:-

- Jusqu'au numéro de série (- 001 309)
- A partir du numéros de série et la suite (001 310 -)

- 6 **Ensembles et accessoires:** Partout où ce la est possible. les Pièces constituant des ensembles ou des accessoires sont représentées sur les éclates avec des parenthèses ou des flèches. Les pièces constituant des ensembles ou des accessoires sont indiquées par l'une des méthodes suivantes:-

- (A) Lorsque les ensembles ou les accessoires sont simple, l'énumération est entièrement ouverte par la description.
- (B) Lorsque les ensembles ou les accessoires comportent quatre pièces ou plus, l'énumération des pièces constituant suit la description avec la mention:

Comprenant:

- (C) Les ensembles ou les accessoires constitués de nombreuses pièces ont leur numéro mentionné au début de la liste de l'unité, suivi de l'énumération des pièces constituant .

Lorsque les différentes pièces d'un ensemble ne sont pas disponibles séparément, elles sont repérées en conséquence.

- 7 **Pièces d'attache ordinaires:** Se présentent sous forme abrégée et décalées par rapport aux pièces principales avec lesquelles elles sont utilisées. Elles devront être commandées telles qu'elles sont énumérées étant donné qu'elles ne font pas partie des pièces qu'elles assemblent. Les pièces d'attache identifiées par un numéro de pièce ont été conçues pour en emploi déterminé. On ne devra pas les remplacer par des pièces courantes.

**ATTENTION:** Les pièces d'assemblage spécialement conçues pour une application particulière ne devront jamais être remplacées par des pièces courantes.

## EINFÜHRUNG

### Hinweise zum Gebrauch des Katalogs

#### 1. Allgemeines

Der Katalog gliedert sich in drei Hauptteile:

- Einführung
- Teile - illustrationen und - Auflistungen
- Numerisches Ersatzteilverzeichnis

#### 2 Inhaltsverzeichnisse - Für den Katalog

Der Baugruppen - Index im Abschnitt "Einführung" listet die Haupt - Baugruppen in der Reihenfolge auf, wie sie im Katalog erscheinen.

Diesem Index folgt ein alphabetisches Inhaltsverzeichnis, in dem die wesentlichen Teile der Maschine aufgeführt sind.

Am Schluß des Katalogs befindet sich eine numerische Auflistung aller im Katalog erscheinenden Teilnummern.

#### 3 Illustrationen

Die Ersatzteilzeichnungen zeigen die einzelnen Teile in ihrem baulichen Zusammenhang zueinander. Jedes Teil ist mit einer Hinweiszahl versehen.

#### **ACHTUNG:**

Hinweiszahlen dürfen nicht für Ersatzteilbestellungen verwendet werden, sondern nur die CaselH Teilnummern mit ihrer Bezeichnung.

#### 4 Teile - Auflistungen

Alle Ersatzteile sind in numerrischer Reihenfolge der Hinweiszahlen im zugehörigen Ersatzteilbild aufgelistet. Den Teilnummern folgt eine Beschreibung in englischer, französischer und deutscher Sprache, soweit wie erforderlich mit weiteren Erläuterungen. In der folgenden Spalte sind Erläuterungen wie Z.B. Maße angegeben. Die äußerst rechten Spalten nennen die benötigte Stückzahl je Modell. Die im Katalog angeführten Bezeichnungen rechts, links, vorn und hinten sind in Fahrtrichtung gesehen zu verstehen.

"X" in der Stückzahlspalte bedeutet Stückzahl nach Bedarf bestellen.

## **5 Teile-Ersetzungen**

Wenn alte Teile durch neue ersetzt werden, wird der Nachsatz zur Teilnummer "R" gesteigen, zB.: "R1" in "R2", "R11 " in "R12" usw. Bleiben die alten Teile jedoch für Ersatz bestehen, so werden in der Regel hinter der Teile-Beschreibung Angaben über Seriennummern (-001 309) und bei den neuen Teilen (001 310 -) gemacht.

## **6 Montageeinheiten**

Montageeinheiten die geschlossen bestellt werden können, haben eine eigene Teilnummer. Kleine Einheiten sind entweder im Ersatzteilbild mit einer Klammer zusammengefaßt und im Text separat aufgeführt oder mit dem Zusatz "mit ..." oder "bestehend aus ..." gekennzeichnet. Große Montageeinheiten bilden einen eigenen Abschnitt, der mit der Teilnummer der Einheit beginnt, während die Einsteile dann ach folgend aufgeföhnt sind.

## **7 Kleinmaterial**

Kleinteile wie Schrauben, Muttern, Federringe usw. werden im allgemeinen nicht abgebildet. Sie befinden sich im Text eingrückt unter dem HaupKeil, zu dessen Montage sie Verwendung finden. Sie müssen mit dem Hauptteil besonders bestellt werden, da sie nicht zu dessen Lieferumfang gehören.

### **ACHTUNG:**

Kleinteile mit Teilnummern sind für spezielle Anwendungen konstruiert und dürfen deshalb nicht durch andere Teile ersetzt werden.

## INTRODUCCION

A continuacion se facilita un resumen del metodo utilizado al recopilar el presente Catalogo. Conviene, por lo tanto, leer dicho resumen detenidamente.

1. **Generalidades:** Este Catalogo se ha dividido en grupos, tal como se indica en la pagina del indice dactilar numerico. Los numeros dactilares del margen en dicha pagina coinciden con los correspondientes en cada pagina del indice para un grupo determinado, facilitandose asi la consulta rapida para el usuario. Se ha dividido tambien el Catalogo en cuatro secciones independientes. Paginas de introduccion, indices de los conjuntos, ilustraciones y lista de piezas, e indice numerico general.
  
2. **Indices:** Existen tres clases de indices en el presente Catalogo, a saber:
  - A. Indice de grupos en la parte anterior del Catalogo.
  - B. Indices de los conjuntos por grupos separados.
  - C. Indice numerico en la parte posterior del Catalogo, en el que se relacionan todos los numeros de piezas.

NOTA. Es indispensable consultar con frecuencia el Indice de los Conjuntos ya que, de lo contrario, no se podra localizar la unidad correspondiente.

3. **Ilustraciones:** Las ilustraciones de conjuntos despiezados muestran claramente todas las piezas por separado, asi como su relacion entre si. Este metodo de ilustracion facilita mas la localizacion de los componentes, ya sea cuando se soliciten por su denominacion, o bien por su numero de pieza. En cada ilustracion solamente se indican los numeros de referencia. Dichos numeros corresponden con los que se encuentran en la columna de referencias de la lista de piezas que sigue cada ilustracion de despiece.

**ADVERTENCIA:** No deberan utilizarse los numeros de referencia al solicitar piezas. Empleense Siempre los numeros de pieza de IH o su denominacion correspondiente cuando se efectuen pedidos.

4. **Metodo adaptado para relacionar las piezas:** El Catalogo de Piezas se ha dividido en grupos o conjuntos. Los componentes se relacionan por orden del numero de referencia de la ilustracion, seguido de la denominacion completa y de la cantidad requerida por conjunto o unidad. Las piezas que no se indican en la ilustracion aparecen al final por orden alfabetico de nombres.

En este catalogo los terminos "Derecha", "Izquierda", "Delante", Y "Detras", se refieren a la maquina como se ven desde el asiento del operador mirando hacia adelante.

5. **Numeros de pieza:** En los casos en que se hayan anticipado sufijos de letras al numero de pieza, la pieza nueva reemplazara a la antigua a menos que se indique lo contrario. Cuando se utiliza el sufijo R, R2 funcionara en vez de R1, R12 en lugar de R11, R21 en posicion de R11, Y R92 en vez de R91.
6. **Coniuntos y acoplamientos:** Siempre que ha sido posible, se han indicado las piezas componentes de conjuntos o acoplamientos en las ilustraciones despiezados utilizando corchetes o flechas. Las piezas componentes de conjuntos o acoplamientos se relacionan empleando uno de los procedimientos siguientes:
- (a) Para conjuntos o acoplamientos sencillos, la relacion comprende un a denominacion completa.
  - (b) Cuando hay cuatro o mas piezas en los conjuntos o acoplamientos, la relacion de componentes sigue a la denominacion con la palabra "Comprising" (compuesto de).
  - (c) Los sonjuntos o acoplamientos que se componen de muchas piezas disponen del numero de conjunto o de acoplamiento correspondiente al principio de la lista de unidades, seguido de la relacion de componentes.

En los casos en que no se disponga de ciertas piezas de un conjunto para su reparacion, se indican las mismas.

7. **Componentes recios comunes:** (Piezas de aperos): El equipo de construccion recia aparece en nomenclatura abreviada y se indica sangrado debajo de los componentes principlaes con los que se utiliza. Los componentes de dicho equipo recio deben solictarse tal como se relacionan, puesto que no constituyen partes de componentes de la piezas que acoplan. Los componentes recios identificados por numeros de pieza se han concebido para un uso especifico, no debiendo ser reemplazados por piezas de construccion recia de tipo normal.

**ADVERTENCIA:** Las piezas de aperos construidas especialmente para su emplazamiento no deberan sustituirse nunca por piezas normales.

WARNING

ALWAYS WEAR YOUR SEATBELT

- Always keep PTO driving shafts in place to avoid entanglement.  
- Do not implement or connect to tractor PTO shafts.  
- Center and lock drawbar after every PTO.

To prevent latching or separation of implement driving, observe drawbar according to implement manufacturer's recommendations or as follows:

<p><b>PTO Shaft</b></p> <p>540 RPM: 6 splines 1000 RPM: 21 splines 1000 RPM: 26 splines</p>	<p><b>PTO Shaft and Cr. drawbar pin hole</b></p> <p>1", DIAMETER - 14 HOLE - (356mm) 1", DIAMETER - 18 HOLE - (457mm) 1", DIAMETER - 20 HOLE - (508mm)</p>

WARNING

AVOID INJURY OR DEATH

**BEFORE STARTING ENGINE:**

- Read operator manual for safety information and operating instructions.
- Read all tractor safety signs.
- Do not start tractor until you are clear of tractor and equipment.
- Do not start tractor until you are seated and PTO control is off.
- Start engine only from seat.
- Make sure all four wheels are on ground. Keep them in place.

**OPERATION:**

- When working tractor in cold weather, the tractor may stop when transmission is engaged and clutch pedal is depressed. Use brakes to prevent tractor movement.
- Do not release on tractor or equipment.
- Keep hands, feet, and clothing away from power take-off gears.
- For road travel, secure brake pedals, use flashing warning lamps unless prohibited by law and 2000 custom tractors equipped to be legal street and trailer.
- Release of clutch pedal, after down shifting second gear with clutch disengaged, may result in abrupt deceleration of tractor.

**TRACTOR CAN BE UPSET:**

- Tractor upset on turns and rough ground.
- Avoid steep slopes.
- Avoid rear wheel. Pull only from drawbar, never hitch.

**WHEN TRACTOR IS STOPPED:**

- Secure park lock or brake.
- Lower implement to ground.
- Disconnect PTO, stop engine, and wait for all movement to stop before servicing or clearing equipment.

**WARNING**

**AVOID INJURY OR DEATH**

- Always keep PTO drive shaft shields in place to avoid entanglement.  
 - Do not implement any machine to remove PTO shields.  
 - Center and lock drive shaft when using PTO.

To prevent burning or separation of implement drive shaft, protect drive shaft according to implement manufacturer's recommendations as follows:

PTO Shaft	PTO Shaft and its drive shaft pin hole
540 RPM 8 spline	1" DIAMETER - 28 HRC - 126mm
1000 RPM 21 spline	1" DIAMETER - 28 HRC - 140mm

**BEFORE STARTING ENGINE:**

- Read operator manual for safety information and operating instructions.
- Read all tractor safety labels.
- Do not allow other people on either of tractor and equipment.
- Do not start tractor if it is to control or park and PTO cannot be off.
- Shift engine only from start.
- Shields are for your protection. Keep them in place.

**OPERATION:**

- When starting tractor in cold weather, the tractor may move when transmission is engaged and wheels pulled to forward. The tractor is forward tractor movement.
- Do not ride on tractor or equipment.
- Keep hands, feet, and clothing away from power take-off parts.
- Use road wheels, weight brake pedals, use steering locking levers unless prohibited by law and ONLY under the conditions to be kept clear and stable.
- Release of clutch pedal, after down shifting covered gears with clutch disengaged, may result in abrupt deceleration of tractor.

**TRACTOR CAN BE INVERT:**

- Tractor operation on loose and rough ground.
- Avoid steep slopes.
- Avoid over speed. Pull only from drawbar, never hitch.

**WHEN TRACTOR HAS STOPPED:**

- Engage park lock or brake.
- Lower implement to ground.
- Disengage PTO, stop engine, and look for all warnings to stop before servicing or attaching equipment.
